

AQUA-MAX 30/25 MM

CLOSURE SYSTEMS INTERNATIONAL

- Sleek design for optimum savings, improved profit and source reduction for sustainability.
- Tamper-evidence prior to seal release for maximum product security
- From CSI the premier systems provider of closures, capping equipment and capping services.

ENHANCED PROFITABILITY... EXCELLENT PERFORMANCE

AQUA-MAX 30/25 MM

ENHANCED PROFITABILITY... EXCELLENT PERFORMANCE

CSI introduces the new Aqua-Max 30/25 closure. This injection molded design provides improved economics without sacrificing performance. Aqua-Max provides tamper-evidence prior to seal release for maximum product security. The HDPE material provides excellent taste and odor characteristics.

Aqua-Max 30/25 delivers economically with performance!

Efficient Packaging

- One piece linerless closure for non-pressurized bottled water.
- Fits standard 30/25 haute / high profile bottle finish.
- Efficient design improves packaging economics / profits.
- Material source reduction for improved sustainability.

Excellent Performance

- Extended plug seal for sealing performance and tamper evidence / band break prior to seal loss.
- Nib style band provides security and easy application.
- Triple-lead thread design for quick, easy-opening convenience.
- HDPE material for bottled water organoleptic performance.
- Aesthetically pleasing design with embossing option.

Total Capping Solutions

- Closures, capping equipment, and unmatched technical service.
- Application expertise for the lowest total cost of operations.
